

DYMO

CardScan[®] IC
Identification Scanner for Image Capture

Simple, compact, reliable support for your electronic health records.

CardScan Image Capture (IC) accurately captures driver's licenses, insurance cards and other patient information. Used on its own or interfaced with electronic health records and other practice software systems, CardScan IC delivers true, complete color images to help reduce errors, streamline admissions and speed reimbursement.

- Ideal for scanning insurance and ID cards into electronic patient files
- High-resolution color scanner delivers clear, complete color images
- Assists in meeting HIPAA guidelines by promoting improved data security (no more unsecured photocopies of licenses or insurance cards)
- Versatile scanner can be used as either an integrated or a stand-alone device, maximizing flexibility

CardScan[®] IC
Scan patient insurance card and driver's license for input into electronic files

Streamline workflow and assist in meeting HIPAA guidelines
